

Security Advisory 2024-079

Critical SAP Authentication Bypass Vulnerability

August 14, 2024 — v1.0

TLP:CLEAR

History:

• 14/08/2024 — v1.0 – Initial publication

Summary

On August 13, 2024, SAP released a security advisory [1] for a critical authentication bypass vulnerability, **CVE-2024-41730**, in SAP BusinessObjects Business Intelligence Platform. This flaw allows remote attackers to bypass authentication mechanisms, potentially leading to full system compromise. The vulnerability has a CVSS score of 9.8, highlighting its severity.

Technical Details

CVE-2024-41730 is a "missing authentication check" vulnerability. If Single Sign-On is enabled for Enterprise authentication, an attacker can exploit a REST endpoint to obtain a logon token and compromise the system entirely, affecting confidentiality, integrity, and availability [1,2].

Affected Products

- SAP BusinessObjects Business Intelligence Platform version 430
- SAP BusinessObjects Business Intelligence Platform version 440

Recommendations

CERT-EU strongly advises applying the security patches provided by SAP immediately to mitigate this critical vulnerability.
